

Fyntech's Liquid Tool

HELPS REMOVE OR TIGHTEN ALL TYPES OF FASTNERS – DAMAGED OR RUSTED.

- *NOT A GLUE**
- *WORKS INSTANTLY**
- * WIPES CLEAN AFTER USE**
- *NON-CORROSIVE**

Description:

Liquid Tool solution has thousands of hardened cubes in a non-toxic, food grade antifreeze carrying agent. Each block is 5 microns in. These building blocks provide a temporary bridge between the tool and stressed fastener heads for easy removal.

Applications:

- * Stripped screws,
 - *worn gripping and turning tools,
 - *Rounded or Deformed Heads
 - *Seized, Rusted or Hard-To-Reach Spots
 - *Sloppy or Mis-matched Sockets
 - *Stops Bit from Turning in a Chuck
 - *Removal of Headlight Frames, Moldings, etc.
 - *General MRO Uses
 - *Apply to Power Driver for Dry-wall or Deck Screws
 - * Extending tool life
- And Many More

Application Procedure:

Stripped Screws

Apply a drop to the screw head or driver head and wiggle the tool against the screw head while applying moderate pressure to allow the liquid carrier to move the blocks into a bridging position between the tool and any differential surfaces of the damage screw head. Then apply forward and slightly cocked hard pressure against the screw head and turn the screw out. There is no need to clean **Liquid Tool** from the tool or fastener after use as it will not cause corrosion and does not contain petroleum or silicone

Rounded Bolts/Nuts

Apply a few drops to the inside of a box end wrench or socket and place over the bolt and wiggle the tool into place allowing the blocks to form a bridge between the wrench/socket and bolt or nut corners. Cock the wrench or socket against the bolt/screw while applying pressure and turn. There is

Marketed By:

Branch Office : TC 26/2123, Tutors line, Statue, Trivandrum,**

no need to clean **Liquid Tool** from the tool or fastener after use as it will not cause corrosion and does not contain petroleum or silicone

Worn gripping and turning tools:

Apply to head or jaws of driver, wrench, or pliers to increase gripping power. There is no need to clean **Liquid Tool** from the tool or fastener after use as it will not cause corrosion and does not contain petroleum or silicone.

Extending tool life: Keep a residue **Liquid Tool** on driver head, wrench/socket shoulders and plier jaws to keep these surfaces from coming in contact with the fastener head. Let the blocks take the pressure and not the steel surface of your tool. **Liquid Tool** will not cause corrosion and does not contain petroleum or silicone.

Typical usage parameters & Physical Properties:

Grey/Brown Thin Paste
Non-toxic
Non-tacky
Non-flammable
% Solids by weight 50

Odorless
Biodegradable
Non-corroding
Boiling point 212 F
Freezing point = -60 degrees F.

Storage:

- Shelf life exceeds 10 years
- Keep application cap closed when not in use

Incompatibility: oxidizers

Hazardous polymerization: will not occur

Hazardous decomposition products: carbon monoxide

Section V

Spill leak and disposal procedures

Action to take for spills of "BULK" quantities, bulk spills should be contained, collected and disposed of.

Disposal methods: Bulk quantities should be disposed of in accordance with Federal State and Local Regulations

Section VI

Effects of overexposure

Ingestion: upset stomach

Eye contact: irritant

Skin contact: none

Inhalation: N/A

Primary route of entry: Eaten

Section VII

First aid procedures

Eyes: flush with large amounts of water

Inhalation: N/A

Skin: flush with large amount of water

Ingestion: induce vomiting. Drink citrus juice and water. Obtain medical attention.

Notes to Physician same as first aid procedures

Section VIII

Special handling information

Ventilation: N/A

Protective clothing: As necessary

Respiratory: No special equipment is required for use

Eye protection: Use safety goggles if spaying material

Section IX
